

# Marsol Partner Portfolio

## Marine Engineering Services

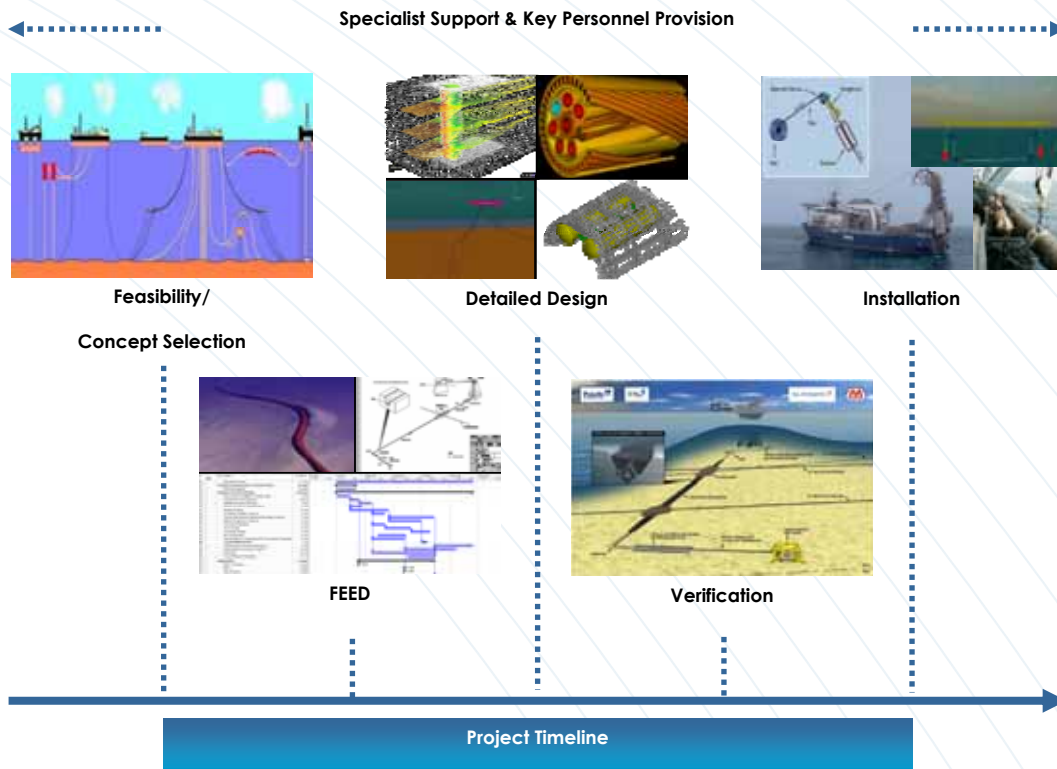

Marsol has a wide international network of partners.

- ~ Core competencies
- ~ Experts in all fields
- ~ To provide services tailored to clients requirements
- ~ No unnecessary overheads, pay for what you need!

**Marsol International works in conjunction with DeepSea, a leading independent subsea engineering consultancy to offer engineering services and project management to Operators, Installation Contractors, and Suppliers from global locations in London, Houston, Aberdeen, Bangkok, and Perth.**

We engineer systems from the wellhead to the production facility, whether fixed, floating or shore-based, including the interfaces either end. With proven success on the most challenging deepwater projects, our expertise in subsea engineering of pipelines / flow lines, risers, umbilicals and structures has been applied throughout the project timeline from concept selection, FEED, detailed design, installation, and verification.

**Growing sustainable marine businesses together**
